Railing Passion

[esp]

Porque nada ni nadie puede imprimirle más pasión a lo que hacemos que nosotros.

Railing Passion es mucho más que el lema de Comenza, es una filosofía de trabajo que inspira a todos los miembros de la empresa en su día a día y que nos compromete con nuestros clientes de cara a desarrollar sistemas y herrajes de barandillas de diseño exclusivo, seguros y fáciles de instalar.

MISION

Diseñar y desarrollar sistemas y herrajes de barandillas que puedan ser instalados en cualquier parte del mundo con un equilibrio óptimo en relación diseño-calidad-precio.

VISION

Ser un referente mundial en el sector de la arquitectura a través del desarrollo de sistemas y herrajes de barandillas de diseño exclusivo, seguros y fáciles de instalar.

[eng]

Because nobody can put more passion into their work than we do.

Railing Passion is much more than a motto at Comenza, it is our working philosophy that inspires all of us at the company during our daily activities. It reflects our commitment to our customers when it comes to developing railing systems and hardware using designs that are unique, safety-oriented, and easy to install.

OUR MISSION

To design and develop railing systems and hardware that can be installed anywhere in the world, with an optimal design-quality-price balance.

OUR VISION

To be a worldwide leader in the architecture sector by developing railing systems and hardware using designs that are unique, safety-oriented, and easy to install.

[fra]

Parce que rien, ni personne ne peut afficher une aussi grande passion que nous dans la fabrication de nos produits.

Railing Passion n'est pas qu'un slogan de Comenza, mais plutôt une philosophie de travail qui inspire l'ensemble de son personnel dans son activité quotidienne et qui nous engage envers nos clients à développer des systèmes et des ferrures pour garde-corps au design exclusif, sûrs et faciles à installer.

NOTRE MISSION

Concevoir et développer des systèmes et des ferrures pour garde-corps pouvant être installés partout dans le monde et offrant un rapport design-qualité-prix équilibré et optimal.

NOTRE VISION

Être un modèle à l'échelle mondiale dans le secteur de l'architecture en développant des systèmes et des ferrures pour garde-corps au design unique, sûrs et faciles à installer.

Passion for safety

Pasión por la seguridad

[esp]

Pasión por la seguridad es el compromiso que en Comenza adquirimos con nuestros clientes de cara a desarrollar y diseñar sistemas de barandillas que cumplan con los códigos de edificación de cada país en el que operamos y que garanticen una total seguridad a los usuarios finales.

Para ello contamos con laboratorio de ensayos propio que nos permite lanzar al mercado sistemas de barandillas previamente probados y testados que garantizan a todos nuestros clientes que las barandillas Comenza son la solución más segura y fiable del mercado.

Además, estamos en continua colaboración con las más prestigiosas empresas de certificación en todo el mundo (CSTB, Applus etc.) para garantizar, vía ensayos certificados, que nuestros sistemas y herrajes de barandillas cumplen con las normativas de cada país.

Passion for safety

[eng]

Passion for safety is the commitment that Comenza offers to its customers when developing and designing railing systems that follows the building codes of any country in which we operate, in order to guarantee full safety and security for the end users.

We comply with this commitment using our own testing laboratory, which allows us to bring pre-tested, proven railing systems to the market. By doing this we can ensure all of our customers that their Comenza railings represent the safest and most reliable solution available.

In addition, we are in constant collaboration with the most prestigious certification companies throughout the world (CSTB, Applus, etc.) to ensure, through certified testing, that our railing systems and hardware follow the building codes and regulations being applied in each country.

Passion pour la sécurité

[fra]

La passion pour la sécurité est l'engagement de Comenza auprès de ses clients en vue de développer et de concevoir des systèmes de garde-corps respectant toutes les réglementations en matière de construction de chaque pays où nous agissons et qui garantissent une sécurité totale aux utilisateurs finaux.

Pour ce faire, nous disposons d'un laboratoire d'essais qui nous permet de lancer sur le marché des systèmes de garde-corps testés au préalable pour garantir à nos clients que les garde-corps Comenza sont la solution la plus sûre et la plus fiable du marché.

En outre, nous sommes en étroite collaboration avec les entreprises de certification les plus renommées au niveau mondial (CSTB, Applus etc.) pour garantir, par le biais d'essais certifiés, que nos systèmes et nos ferrures pour garde-corps sont conformes aux réglementations de chaque pays.

Passion for people

Pasión por las personas

[esp]

La pasión por las personas es uno de los ejes centrales sobre los que se mueve la estrategia corporativa de Comenza. Es por ello que en nuestro afán de garantizar una experiencia excepcional a nuestros clientes contamos con un equipo de personas altamente cualificadas no sólo a nivel profesional sino también a nivel humano dispuestas a mantener este compromiso a toda costa.

Además, en nuestro empeño de acercar la empresa a todos nuestros clientes y ofrecerles un trato personalizado nuestro equipo de atención al cliente nacional e internacional está dispuesto y preparado para ayudarte y resolverte cualquier duda acerca de nuestros sistemas de barandillas en diferentes idiomas como español, inglés, francés o portugués.

Passion for people

[eng]

At Comenza, our passion for people is one of the fundamental principles around which our corporate strategy revolves. This is why we always go the extra mile to give our customers a remarkable experience, with a team of service-oriented individuals who are highly qualified not only in their professions, but also in the way they deal with people. We are always ready to comply with our commitments at any cost.

Our desire to maintain close relationships between our company and our customers and clients is also reflected in the personalized service offered by our national and international customer service teams. They are always ready and willing to assist you and answer any questions you may have regarding our railing systems in a variety of languages, such as Spanish, English, French, and Portuguese.

Passion pour les personnes

[fra]

La passion pour les personnes est l'un des principaux piliers sur lequel repose la stratégie commerciale de Comenza. Pour garantir une expérience exceptionnelle à nos clients, nous avons une équipe de personnes hautement qualifiées non seulement au niveau professionnel mais aussi humain, soucieuse de maintenir coûte que coûte cet engagement.

Par ailleurs, pour offrir un service personnalisé et optimal à nos clients, notre équipe clientèle nationale et internationale est à votre entière disposition pour dissiper tous vos doutes sur nos systèmes de garde-corps. Cette assistance est offerte en plusieurs langues telles que l'espagnol, l'anglais, le français ou le portugais.

Passion for design

Pasión por el diseño

[esp]

En Comenza creemos firmemente que nuestra pasión por el diseño es una de las razones por las cuales los arquitectos e interioristas más relevantes del panorama internacional están especificando nuestros sistemas de barandillas en sus proyectos más exclusivos.

Desde proyectos hoteleros pasando por centros comerciales o viviendas unifamiliares el diseño exclusivo con el que cuentan todos los sistemas Comenza nos permite adaptarnos fácilmente a las tendencias de la arquitectura contemporánea.

Todo esto es posible gracias al equipo de diseñadores e ingenieros que componen el departamento de I+D+I de Comenza cuya filosofía de trabajo permite desarrollar soluciones innovadoras que posibilitan instalar fácilmente todos nuestros sistemas a la vez que dotarles de un diseño único y exclusivo.

Passion for design

[eng]

At Comenza we firmly believe that our passion for design is one of the reasons why some of the most notable architects and interior designers on the international scene are specifying our railing systems for their most prestigious projects.

From hotel projects to shopping centers to single-family homes, the exclusive designs used in all of our Comenza systems allow us to easily adapt to the latest trends in contemporary architecture.

All of this is possible thanks to our team of designers and engineers who make up Comenza's R&D department. Our team's working philosophy allows us to develop innovative solutions that make all of our railing systems and hardware easy to install while also featuring unique and exclusive designs.

Passion pour le dessin

[fra]

Chez Comenza, nous sommes convaincus que notre passion pour le design est l'une des raisons pour lesquelles les architectes et décorateurs d'intérieurs de renommée internationale font appel à nos systèmes de garde-corps pour leurs projets les plus exclusifs.

Le design exclusif utilisé dans les systèmes Comenza nous permet de nous adapter plus facilement aux tendances de l'architecture contemporaine à travers de nombreux projets (hôteliers, de centres commerciaux ou de maisons individuelles, entre autres).

Tout cela est possible grâce à l'équipe de designers et d'ingénieurs du département R&D&I de Comenza dont la philosophie de travail se centre sur le développement de solutions innovantes permettant l'installation facile de nos systèmes, en les dotant à la fois d'un design unique et exclusif.

Internacional

[esp]

Siguiendo la filosofía "piensa global actúa local" te ofrecemos sistemas de barandillas de alta calidad adaptados técnicamente a las exigencias de cada mercado con un diseño único, máxima funcionalidad y en las mejores condiciones logísticas y de suministro.

Gracias a los más de 2000 clientes que a lo largo de este tiempo confían y han confiado en nuestra marca, los sistemas de barandillas Comenza se instalan y distribuyen hoy día en más de 25 países de todo el mundo.

International

[eng]

Following the philosophy of "think globally, act locally", we can offer you high-quality railing systems technically adapted to the demands of any market. Our systems feature unique designs, maximum functionality, and the best practices in logistics and supply.

Thanks to the 2000+ customers who have trusted us and relied upon our brand, Comenza railing systems are now being distributed and installed in over 25 countries around the world.

International

[fra]

En réponse à la philosophie "pense globalement, agit localement", nous vous offrons des systèmes de garde-corps de grande qualité adaptés techniquement aux exigences de chaque marché avec un design unique et une fonctionnalité maximum, et ce dans les meilleures conditions logistiques et de livraison.

Jusqu'à présent, plus de 2000 clients ont accordé leur confiance à notre entreprise et à notre marque. Les systèmes de garde-corps Comenza sont installés et distribués dans plus de 25 pays à travers le monde.

**Instalación / Installation / Installation****1****2****3**BR-2012
Pag. 108

El soporte está diseñado para posibilitar su fijación en un solo tiempo usando tacos premontados. Una vez finalizado el montaje y asegurado el soporte sobre la superficie de apoyo, se fija el embellecedor ejerciendo una pequeña presión sobre la base, quedando la goma oculta en su interior. [img.1]

Pasos de instalación con ST-353:

1. Taladrado de la pared
2. Colocación de pieza
3. Fijar el soporte a la pared con el tajo premontado [img.2]

Pasos de instalación en soportes convencionales:

1. Taladrado de la pared
2. Colocación del tirafondo
3. Colocación de la pieza
4. Fijar el soporte [img.3]

This product has been designed to enable its fixing at once using nylon hammer drive anchor. Once the assembly is finished and the support is fastened on the support surface, the cover is placed pressing slightly on the base, and the rubber rests hidden inside. [img.1]

Installation steps with ST-353:

1. Drill the wall.
2. Place the ST-353.
3. Fix the support to the wall with the preassembled anchor. [img.2]

Installation steps with traditional supports:

1. Drill the wall.
2. Place the lag bolt.
3. Fix the piece.
4. Fix the support. [img.3]

Ce support a été conçu pour faire possible la fixation d'un coup d'ancrages pré-assemblés du type de cheville en plastique. Quand le montage est fini et le support bien fixé à la surface d'appui, on fixe l'enjoliveur en exerçant une petite pression sur la base, en restant la caoutchouc torique cache dans l'intérieur. [img.1]

Installation avec le support ST-353:

1. On perce le mur.
2. On place la ST-353
3. On fixe le support au mur avec l'ancrage pré-assemblé. [img.2]

Installation avec un support traditionnel:

1. On perce le mur.
2. On place la vis tire-fond.
3. On place la pièce.
4. On fixe le support. [img.3]

**FAST FIX GLUE (A-B 100ML)**

1 kit

Duración aproximada / Estimated duration / Duration approximative

ø50,8	ø43	ø38,1	ø20	ø12
40	50	60	120	150

Características FAST-FIX GLUE

- Envase bicomponente A+B
- Tiempo de manipulación: 1-3min
- Resistencia funcional: 30-60min
- Resistencia final: 24h
- Cubre holguras hasta 0.5mm (holgura máxima recomendada entre 0.1mm y 0.3mm)
- Cantidad:50+50ml
- Conservar en un lugar fresco y seco a una temperatura de menos de 20°C.

FAST-FIX GLUE characteristics:

- Two-component A+B package
- Manipulation time: 1-3 min
- Functional strength: 30-60 min
- Final strength: 24 hours
- Fills gaps of up to 0.5 mm (maximum recommended gap between 0.1 mm and 0.3 mm)
- Volume: 50+50 ml
- Store in a cool dry place at a temperature below 20°C

Caractéristiques FAST-FIX GLUE

- Emballage bicomposant A+B
- Temps de manipulation: 1-3 min
- Résistance fonctionnelle: 30-60 min
- Résistance finale: 24 h
- L'emballage admet des jeux allant jusqu'à 0,5 mm (jeu maximum recommandé: de 0,1 mm à 0,3 mm)
- Volume: 50 + 50 ml
- À conserver dans un endroit frais et sec à une température inférieure à 20 °C.

**Railing
Passion**

Railing Passion

[esp]

Porque nada ni nadie puede imprimirle más pasión a lo que hacemos que nosotros.

Railing Passion es mucho más que el lema de Comenza, es una filosofía de trabajo que inspira a todos los miembros de la empresa en su día a día y que nos compromete con nuestros clientes de cara a desarrollar sistemas y herrajes de barandillas de diseño exclusivo, seguros y fáciles de instalar.

MISION

Diseñar y desarrollar sistemas y herrajes de barandillas que puedan ser instalados en cualquier parte del mundo con un equilibrio óptimo en relación diseño-calidad-precio.

VISION

Ser un referente mundial en el sector de la arquitectura a través del desarrollo de sistemas y herrajes de barandillas de diseño exclusivo, seguros y fáciles de instalar.

[eng]

Because nobody can put more passion into their work than we do.

Railing Passion is much more than a motto at Comenza, it is our working philosophy that inspires all of us at the company during our daily activities. It reflects our commitment to our customers when it comes to developing railing systems and hardware using designs that are unique, safety-oriented, and easy to install.

OUR MISSION

To design and develop railing systems and hardware that can be installed anywhere in the world, with an optimal design-quality-price balance.

OUR VISION

To be a worldwide leader in the architecture sector by developing railing systems and hardware using designs that are unique, safety-oriented, and easy to install.

[fra]

Parce que rien, ni personne ne peut afficher une aussi grande passion que nous dans la fabrication de nos produits.

Railing Passion n'est pas qu'un slogan de Comenza, mais plutôt une philosophie de travail qui inspire l'ensemble de son personnel dans son activité quotidienne et qui nous engage envers nos clients à développer des systèmes et des ferrures pour garde-corps au design exclusif, sûrs et faciles à installer.

NOTRE MISSION

Concevoir et développer des systèmes et des ferrures pour garde-corps pouvant être installés partout dans le monde et offrant un rapport design-qualité-prix équilibré et optimal.

NOTRE VISION

Être un modèle à l'échelle mondiale dans le secteur de l'architecture en développant des systèmes et des ferrures pour garde-corps au design unique, sûrs et faciles à installer.

Passion for safety

Pasión por la seguridad

[esp]

Pasión por la seguridad es el compromiso que en Comenza adquirimos con nuestros clientes de cara a desarrollar y diseñar sistemas de barandillas que cumplan con los códigos de edificación de cada país en el que operamos y que garanticen una total seguridad a los usuarios finales.

Para ello contamos con laboratorio de ensayos propio que nos permite lanzar al mercado sistemas de barandillas previamente probados y testados que garantizan a todos nuestros clientes que las barandillas Comenza son la solución más segura y fiable del mercado.

Además, estamos en continua colaboración con las más prestigiosas empresas de certificación en todo el mundo (CSTB, Applus etc.) para garantizar, vía ensayos certificados, que nuestros sistemas y herrajes de barandillas cumplen con las normativas de cada país.

Passion for safety

[eng]

Passion for safety is the commitment that Comenza offers to its customers when developing and designing railing systems that follows the building codes of any country in which we operate, in order to guarantee full safety and security for the end users.

We comply with this commitment using our own testing laboratory, which allows us to bring pre-tested, proven railing systems to the market. By doing this we can ensure all of our customers that their Comenza railings represent the safest and most reliable solution available.

In addition, we are in constant collaboration with the most prestigious certification companies throughout the world (CSTB, Applus, etc.) to ensure, through certified testing, that our railing systems and hardware follow the building codes and regulations being applied in each country.

Passion pour la sécurité

[fra]

La passion pour la sécurité est l'engagement de Comenza auprès de ses clients en vue de développer et de concevoir des systèmes de garde-corps respectant toutes les réglementations en matière de construction de chaque pays où nous agissons et qui garantissent une sécurité totale aux utilisateurs finaux.

Pour ce faire, nous disposons d'un laboratoire d'essais qui nous permet de lancer sur le marché des systèmes de garde-corps testés au préalable pour garantir à nos clients que les garde-corps Comenza sont la solution la plus sûre et la plus fiable du marché.

En outre, nous sommes en étroite collaboration avec les entreprises de certification les plus renommées au niveau mondial (CSTB, Applus etc.) pour garantir, par le biais d'essais certifiés, que nos systèmes et nos ferrures pour garde-corps sont conformes aux réglementations de chaque pays.

Passion for people

Pasión por las personas

[esp]

La pasión por las personas es uno de los ejes centrales sobre los que se mueve la estrategia corporativa de Comenza. Es por ello que en nuestro afán de garantizar una experiencia excepcional a nuestros clientes contamos con un equipo de personas altamente cualificadas no sólo a nivel profesional sino también a nivel humano dispuestas a mantener este compromiso a toda costa.

Además, en nuestro empeño de acercar la empresa a todos nuestros clientes y ofrecerles un trato personalizado nuestro equipo de atención al cliente nacional e internacional está dispuesto y preparado para ayudarte y resolverte cualquier duda acerca de nuestros sistemas de barandillas en diferentes idiomas como español, inglés, francés o portugués.

Passion for people

[eng]

At Comenza, our passion for people is one of the fundamental principles around which our corporate strategy revolves. This is why we always go the extra mile to give our customers a remarkable experience, with a team of service-oriented individuals who are highly qualified not only in their professions, but also in the way they deal with people. We are always ready to comply with our commitments at any cost.

Our desire to maintain close relationships between our company and our customers and clients is also reflected in the personalized service offered by our national and international customer service teams. They are always ready and willing to assist you and answer any questions you may have regarding our railing systems in a variety of languages, such as Spanish, English, French, and Portuguese.

Passion pour les personnes

[fra]

La passion pour les personnes est l'un des principaux piliers sur lequel repose la stratégie commerciale de Comenza. Pour garantir une expérience exceptionnelle à nos clients, nous avons une équipe de personnes hautement qualifiées non seulement au niveau professionnel mais aussi humain, soucieuse de maintenir coûte que coûte cet engagement.

Par ailleurs, pour offrir un service personnalisé et optimal à nos clients, notre équipe clientèle nationale et internationale est à votre entière disposition pour dissiper tous vos doutes sur nos systèmes de garde-corps. Cette assistance est offerte en plusieurs langues telles que l'espagnol, l'anglais, le français ou le portugais.

***Passion
for design***

Pasión por el diseño

[esp]

En Comenza creemos firmemente que nuestra pasión por el diseño es una de las razones por las cuales los arquitectos e interioristas más relevantes del panorama internacional están especificando nuestros sistemas de barandillas en sus proyectos más exclusivos.

Desde proyectos hoteleros pasando por centros comerciales o viviendas unifamiliares el diseño exclusivo con el que cuentan todos los sistemas Comenza nos permite adaptarnos fácilmente a las tendencias de la arquitectura contemporánea.

Todo esto es posible gracias al equipo de diseñadores e ingenieros que componen el departamento de I+D+I de Comenza cuya filosofía de trabajo permite desarrollar soluciones innovadoras que posibilitan instalar fácilmente todos nuestros sistemas a la vez que dotarles de un diseño único y exclusivo.

Passion for design

[eng]

At Comenza we firmly believe that our passion for design is one of the reasons why some of the most notable architects and interior designers on the international scene are specifying our railing systems for their most prestigious projects.

From hotel projects to shopping centers to single-family homes, the exclusive designs used in all of our Comenza systems allow us to easily adapt to the latest trends in contemporary architecture.

All of this is possible thanks to our team of designers and engineers who make up Comenza's R&D department. Our team's working philosophy allows us to develop innovative solutions that make all of our railing systems and hardware easy to install while also featuring unique and exclusive designs.

Passion pour le dessin

[fra]

Chez Comenza, nous sommes convaincus que notre passion pour le design est l'une des raisons pour lesquelles les architectes et décorateurs d'intérieurs de renommée internationale font appel à nos systèmes de garde-corps pour leurs projets les plus exclusifs.

Le design exclusif utilisé dans les systèmes Comenza nous permet de nous adapter plus facilement aux tendances de l'architecture contemporaine à travers de nombreux projets (hôteliers, de centres commerciaux ou de maisons individuelles, entre autres).

Tout cela est possible grâce à l'équipe de designers et d'ingénieurs du département R&D&I de Comenza dont la philosophie de travail se centre sur le développement de solutions innovantes permettant l'installation facile de nos systèmes, en les dotant à la fois d'un design unique et exclusif.

Internacional

[esp]

Siguiendo la filosofía "piensa global actúa local" te ofrecemos sistemas de barandillas de alta calidad adaptados técnicamente a las exigencias de cada mercado con un diseño único, máxima funcionalidad y en las mejores condiciones logísticas y de suministro.

Gracias a los más de 2000 clientes que a lo largo de este tiempo confían y han confiado en nuestra marca, los sistemas de barandillas Comenza se instalan y distribuyen hoy día en más de 25 países de todo el mundo.

International

[eng]

Following the philosophy of "think globally, act locally", we can offer you high-quality railing systems technically adapted to the demands of any market. Our systems feature unique designs, maximum functionality, and the best practices in logistics and supply.

Thanks to the 2000+ customers who have trusted us and relied upon our brand, Comenza railing systems are now being distributed and installed in over 25 countries around the world.

International

[fra]

En réponse à la philosophie "pense globalement, agit localement", nous vous offrons des systèmes de garde-corps de grande qualité adaptés techniquement aux exigences de chaque marché avec un design unique et une fonctionnalité maximum, et ce dans les meilleures conditions logistiques et de livraison.

Jusqu'à présent, plus de 2000 clients ont accordé leur confiance à notre entreprise et à notre marque. Les systèmes de garde-corps Comenza sont installés et distribués dans plus de 25 pays à travers le monde.

Oficina técnica

[esp]

En Comenza queremos facilitarte la labor de prescripción de nuestros sistemas en tus proyectos de barandillas.

Es por ello que en www.comenza.com podrás encontrar y descargar toda la documentación necesaria como son las memorias descriptivas, detalles constructivos en CAD, objetos BIM, fichas técnicas de anclajes, ensayos y certificados que te permitirán realizar una prescripción perfecta de todos nuestros sistemas de barandillas.

Y si esto no es suficiente, también puedes contar con los servicios personalizados de nuestra oficina técnica cuya misión es la de ayudarte tanto en la selección del sistema de barandilla más adecuado como en el desarrollo técnico necesario para adaptar nuestros productos a tus proyectos.

Technical office

[eng]

At Comenza we want to make it easy for you to find and select the right specifications when incorporating our systems into your railing projects.

This is why at www.comenza.com you can find and download all of the documentation you may need, such as technical specifications, CAD details, BIM objects, anchoring info, and testing reports and certificates, so that you can always make the right decisions in relation to our railing systems.

And if you still have any questions, we also offer personalized services from our technical office. Their mission is to help you select the best railing system to fit your needs, and to follow through with any technical assistance you may require in order to adapt our products to your plans.

Bureau d'étude

[fra]

Chez Comenza, nous souhaitons vous faciliter la tâche de prescription de nos systèmes pour vos projets de garde-corps.

Depuis le site www.comenza.com, vous pourrez ainsi trouver et télécharger toute la documentation nécessaire telles que des mémoires descriptifs, des détails de construction en CAD, des objets BIM, des fiches techniques d'ancrages, des essais et des certificats qui vous permettront de réaliser une prescription parfaite de tous nos systèmes de garde-corps.

Pour de plus amples informations, vous pouvez aussi bénéficier du service personnalisé de notre bureau technique dont la mission est de vous aider aussi bien dans la sélection de systèmes de garde-corps que le développement technique nécessaire pour adapter nos produits à vos projets.

Sistema / System / Système

GlassFit SV-1501

Top

GlassFit

SV-1501 Top

[esp]

El nuevo sistema de barandillas GlassFit SV-1501 Top es adecuado para la instalación de barandillas sometidas a cargas ligeras y por sus dimensiones y diseño se convierte en la opción ideal para colocar sobre murete.

Diseñado conforme a normativas internacionales para usos en espacios públicos y privados, se convierte en la mejor solución para la instalación en terrazas y balcones.

Además, este sistema permite incluir tecnología de iluminación LED que proporciona soluciones de ambientación estética y de señalización.

Este sistema reúne los valores diferenciales de la marca Comenza:

- Diseño: Se reduce considerablemente la altura exterior del perfil confiriéndole un aspecto mucho más estético y minimalista.

- Seguridad: Nuestro objetivo es garantizar la seguridad del usuario final, cumpliendo todos los requisitos técnicos de carácter legal y reglamentario. Ensayamos nuestros sistemas según normativas internacionales en nuestro laboratorio y certificadoras acreditadas.

- Facilidad de instalación: Los notables avances incluidos en este sistema en cuanto a posibilidades de anclaje y mejoras en dimensiones y peso, hacen que sea todavía más fácil y rápido de instalar.

[eng]

The new GlassFit SV-1501 Top railing system is suitable for the installation of balustrades which are subjected to light loads. Due to its dimensions and design, it is the ideal option for placing on low walls.

Designed in accordance with international regulations for use in public and private spaces, it is the best solution for installation on terraces and balconies.

In addition, this system includes LED lighting technology, providing aesthetic and illuminating environment solutions.

This system brings together the differential values of the Comenza brand:

- Design: The outer height of the profile is reduced considerably, giving it a much more aesthetic and minimalist appearance.

- Safety: Guaranteed safety of all balustrades and rail systems for the client, complying with all legal and regulatory technical requirements. We test our systems in our laboratory in accordance with international regulations and accredited certifiers.

- Ease of installation: The remarkable advances included in this system in terms of anchoring possibilities and improvements in dimensions and weight, make it even easier and faster to install.

[fra]

Le nouveau système de garde-corps GlassFit SV-1501 convient pour l'installation de garde-corps soumis à des charges légères; ses dimensions et sa conception en font le choix idéal pour un montage sur un muret.

Conçue selon les normes internationales pour une utilisation dans des espaces publics et privés, voici la meilleure solution pour une installation sur les terrasses et les balcons.

De plus, ce système permet d'inclure la technologie d'éclairage LED fournissant des solutions pour une ambiance esthétique et la signalisation.

Ce système réunit les valeurs qui diffèrent la marque Comenza :

- Design: La hauteur extérieure du profil est considérablement réduite, ce qui lui confère un aspect beaucoup plus esthétique et minimaliste.

- Sécurité: Notre objectif est de garantir la sécurité de l'utilisateur final, en respectant tous les prérequis techniques de nature juridique et réglementaire. Nous testons nos systèmes selon les normes internationales dans notre laboratoire et chez des certificateurs accrédités.

- Facilité d'installation: Les progrès remarquables dont bénéficie ce système au niveau des fixations et de l'amélioration des dimensions et du poids le rendent encore plus facile et plus rapide à installer.

GlassFit SV-1801
Top

GlassFit

SV-1801 Top

[esp]

El nuevo sistema de barandillas GlassFit SV-1801 Top permite la instalación en zonas que soportan grandes aglomeraciones de gente como estadios, salas de concierto o estaciones de tren, y en zonas sujetas a fuertes cargas de viento como azoteas, balcones o miradores. Este sistema ha sido diseñado conforme a normativas internacionales para usos en espacios públicos y privados.

Además de los habituales sistemas de drenaje interior, kits de acristalamiento, tapas y accesorios, este sistema permite incluir tecnología de iluminación LED que proporciona soluciones de ambientación estética y de señalización.

- Diseño: El hueco del perfil y el kit de acristalamiento han sido especialmente diseñados para posibilitar el montaje de vidrios con un espesor de hasta 31,52mm.

- Seguridad: Nuestro objetivo es garantizar la seguridad del usuario final, cumpliendo todos los requisitos técnicos de carácter legal y reglamentario. Ensayamos nuestros sistemas según normativas internacionales en nuestro laboratorio y certificadoras acreditadas.

- Facilidad de instalación: Los notables avances incluidos en este sistema en cuanto a posibilidades de anclaje y mejoras en dimensiones y peso, hacen que sea fácil de instalar y con menor huella medioambiental.

[eng]

The new GlassFit SV-1801 Top railing system allows installation in areas that support large crowds of people such as stadiums or concert halls, and in areas exposed to adverse weather conditions such as strong wind loads on roofs, balconies, viewpoints, viewing platforms and spectator areas. This system has been designed in accordance with international regulations for use in public and private spaces.

In addition to the usual interior drainage systems of the profile, glazing kits, end caps and accessories, this system includes LED lighting technology, providing aesthetic and illuminating environment solutions.

- Design: The profile hole and the glazing kit have been specially designed to allow the assembly of glass with a thickness of up to 31.52mm.

- Safety: Guaranteed safety of all balustrades and rail systems for the client, complying with all legal and regulatory technical requirements. We test our systems in our laboratory in accordance with international regulations and accredited certifiers.

- Ease of installation: The remarkable advances included in this system in terms of anchoring possibilities and improvements in dimensions and weight, allow a simpler installation while offering a more environmentally friendly product, therefore reducing the environmental footprint.

[fra]

Le nouveau système de garde-corps GlassFit SV-1801 permet son installation dans des endroits qui accueillent de grandes agglomérations de foules comme les stades ou les salles de concert, ou des endroits exposés à des conditions météorologiques défavorables comme à de fortes rafales de vent sur les toits, les balcons ou les belvédères. Ce système a été conçu conformément aux normes internationales pour une utilisation dans les espaces publics et privés.

Font partis du système les compléments habituels comme le drainage des profilés intérieurs, les kits de vitrage, les embouts et les accessoires, ce système permet l'intégration de la technologie d'éclairage LED qui fournit une ambiance esthétique et des solutions de signalisation.

- Design: La conception du profilé et le kit de vitrage permettent l'installation de verres d'une épaisseur maximale de 31,52 mm.

- Sécurité: Notre objectif est de garantir la sécurité de l'utilisateur final, en respectant tous les prérequis techniques de nature juridique et réglementaire. Nous testons nos systèmes selon les normes internationales dans notre laboratoire et chez des certificateurs accrédités.

- Facilité d'installation: Les avancées notables comprises dans ce système en termes de possibilités de fixation et d'amélioration des dimensions et du poids offrent une installation plus simple tout en proposant un produit plus respectueux de l'environnement en réduisant l'empreinte écologique.

Level IN

[esp]

Una vez más el trabajo de nuestro departamento de I+D+I da como resultado una innovación sólo al alcance de empresas y marcas innovadoras como es el caso de Comenza.

En esta ocasión hemos conseguido desarrollar un dispositivo que ahorrará a los instaladores de barandillas de vidrio Comenza tiempo y dinero, y que en definitiva les permitirá competir en el mercado más y mejor.

El dispositivo **Level-In** elimina el gran inconveniente de los dispositivos tradicionales de cuñas fijas, la imposibilidad de nivelar los vidrios y además consigue que esa nivelación sea económica, fácil, rápida y segura.

Ventajas y beneficios:

- Compatible con SV-1401 Top, SV-1402 Side, SV-1403 Top y SV-1404 Side
- Nivelación de $\pm 1^\circ$ y fijación de los vidrios ultra sencilla con cuñas de presión. No se necesitan útiles ni herramientas especiales.
- El acristalamiento de la barandilla se realiza siempre desde el interior. No es necesario colocar andamios exteriores.
- No existe flecha residual. Gracias al dispositivo de seguridad de la "top wedge", cuando la barandilla se somete a cargas lineales, el vidrio recupera su posición original de manera natural.

[eng]

Once again, the innovations at Comenza's R&D Department are taking place at a level only achieved by the most innovative companies and brands.

In our most recent case, we have developed a device that will save both time and money for those who are installing Comenza's glass railings, significantly improving their ability to compete in the market.

The **Level-In** device eliminates a serious inconvenience seen with traditional fixed-wedge systems, and it simplifies leveling of the glass pane by making this process quick, easy, economical and safe.

Advantages and benefits:

- Compatible with SV-1401 Top, SV-1402 Side, SV-1403 Top, and SV-1404 Side.
- $\pm 1^\circ$ leveling and ultra-simple attachment of glass panes using pressure wedges, with no special tools or equipment required.
- The glass is always installed on the railing from the inside, so there is no need to put up exterior scaffolding.
- There is no residual deflection. Thanks to the safety device of the "top wedge", when the railing is subjected to linear loads it recovers its original position in a natural manner.

[fra]

Une fois de plus, l'élan innovateur du département R&D&I de Comenza la distingue comme un acteur clé parmi les entreprises et les marques innovatrices du secteur.

Très récemment, nous avons développé un dispositif qui permet aux installateurs de garde-corps en verre de Comenza d'économiser du temps, de l'argent, et de devenir un redoutable concurrent sur le marché.

Le dispositif Level-In élimine l'un des grands inconvénients des dispositifs traditionnels à cales fixes, à savoir l'impossibilité de niveler les verres, et assure un niveling économique, facile, rapide et sûr.

Avantages et bénéfices:

- Compatible avec SV-1401 Top, SV-1402 Side, SV-1403 Top et SV-1404 Side.
- Nivellement de $\pm 1^\circ$ et fixation ultra-simple des verres au moyen de cales de pression, sans le besoin d'outils ni d'équipements spéciaux.
- Le verre est toujours fixé sur le garde-corps depuis l'intérieur. L'utilisation d'échafaudage extérieur n'est donc pas nécessaire.
- Il n'existe pas de flèche résiduelle. Grace au dispositif de sécurité du "top wedge", lorsque le garde-corps est soumis à une charge linéaire, le verre récupère sa position originale de façon naturelle.

[esp]

La nueva línea de perfiles GlassFit de Comenza permite a nuestros clientes adaptarse a prácticamente todas las posibles situaciones de instalación en obra: montaje superior (SV-1401 Top, SV-1403 Top) y montaje lateral (SV-1402 Side, SV-1404 Side).

Esta nueva linea de perfiles fabricada en aluminio 6063 T6 viene acompañada de un completa gama de accesorios, tapas y complementos que harán la instalación de nuestros sistemas de barandillas más fácil y más segura.

Además, los nuevos perfiles son más robustos y seguros y te permitirán abordar instalaciones tanto en espacios de uso privado (balcones hoteles, vivienda unifamiliar) como de uso público (centros comerciales, edificios públicos, rooftop hoteles etc)

Ventajas y beneficios:

- Ensayos de carga lineal conforme a las normativas británica (BS 6180), francesa (Avis Technique 2.1/18-1794_V1 / CSTB), española (CTE), noruega (NS) y danesa (DS/EN) para usos públicos y privados.
- Sólo se necesitan cuatro anclajes por metro lineal.
- Permite anclaje a hormigón, metal y madera.
- Drenaje interior. En caso de que el agua penetre en el interior los perfiles permiten el paso del agua.
- Perfiles SV-1403 Top y SV-1404 Side permiten la instalación en el borde del forjado y con mayores recercidos.

[eng]

The new GlassFit line of profiles from Comenza can always be adapted to the specific on-site installation needs of our clients, in almost any possible installation scenario including top mounting (SV-1401 Top, SV-1403 Top) and side mounting (SV-1402 Side, SV-1404 Side).

This new line of profiles is manufactured in aluminium 6063 T6 and it includes a full range of accessories, end caps, and complementary parts that make installation of our railing systems even easier and safer.

In addition to being stronger and safer, these new profiles can be installed at all kinds of residential sites (hotel balconies, single-family homes) as well as in public projects (shopping centers, public buildings, hotel rooftop terraces, etc.).

Advantages and benefits:

- Linear load testings according to British (BS 6180), French (Avis Technique 2.1/18-1794_V1 / CSTB), Spanish (CTE), Norwegian (NS) and Danish (DS/EN) regulations, both for public and private uses.
- Only four anchors per meter are needed
- Allow anchoring to concrete, metal and wood.
- Internal drainage. If water happens to get inside of the profiles, it will be able to drain out.
- The SV-1403 Top and SV-1404 Side profiles allow for installation directly to the edge of the building's structure and higher grout thickness.

[fra]

La nouvelle ligne de profils GlassFit de Comenza a été conçue pour s'adapter à la plupart des plans d'exécution de nos clients: pose à la française (SV-1401 Top, SV-1403 Top) et pose à l'anglaise (SV-1402 Side, SV-1404 Side).

Cette nouvelle ligne de profils fabriqué en aluminium 6063 T6 comprend une gamme complète d'accessoires, d'embouts de finition et de compléments qui permettent une installation facile et sûre de nos systèmes de garde-corps.

Grâce à un design robuste et sûr, les nouveaux profils seront vos meilleurs alliés aussi bien dans vos ouvrages résidentiels (balcons hôtels, maisons individuelles) que publics (centres commerciaux, bâtiments publics, rooftop hôtels, etc.)

Avantages et bénéfices :

- Essais de charge linéaire testées selon normative britannique (BS 6180), française (Avis Technique 2.1/18-1794_V1 / CSTB), espagnole (CTE), norvégienne (NS) et danoise (DS/EN), pour les utilisations dans les espaces publics et privés.
- Uniquement quatre ancrages par mètre linéal.
- Permettre ancrage sur béton, métal et bois.
- Drainage intérieur. En cas d'infiltration d'eau à l'intérieur des profils, ceux-ci laissent passer l'eau.
- Les profils SV-1403 Top et SV-1404 Side permettent d'installer directement sur le bord du plancher et une plus épaisseur de la couche de râgrage.

Sistema de pinzas vidrio para suelo / Base glass clamp system / Système de pinces à verre de sol

 **comenza**
Railing Passion

Sistema / System / Système
GlassFit CC-780

GlassFit

CC-780

[esp]

El nuevo sistema de barandillas de cristal con pinza de suelo incorpora el dispositivo **Level 3D** que permite salvar irregularidades del forjado manteniendo la estética.

Diseñado conforme a los diferentes Códigos Técnicos de Edificación para usos en espacios privados como viviendas unifamiliares, balcones de hoteles y edificios residenciales o como cerramiento de piscinas. Ensayo de carga de 0,8 kN certificado por Applus.

Este sistema reúne los valores diferenciales de la marca Comenza:

- Diseño. El diseño del sistema CC-780 se caracteriza por ser innovador, minimalista y elegante, en consonancia con la arquitectura actual.

- Seguridad. Nuestro objetivo es garantizar la seguridad del usuario final, cumpliendo todos los requisitos técnicos de carácter legal y reglamentario. Ensayamos nuestros sistemas según las normativas internacionales en nuestro laboratorio y en certificadoras acreditadas.

- Facilidad de instalación. De acuerdo con nuestro compromiso de garantizar montajes sencillos, rápidos y económicos, el nuevo sistema GlassFit CC-780 incorpora los dispositivos de nivelación Slot 180 y Level 3D que permiten una perfecta nivelación con el vidrio instalado.

[esp]

The new glass railing system with floor clamp incorporates the **Level 3D** device which has the capacity to supersede irregularities of an uneven floor while maintaining desirable aesthetics.

Designed according to the different Technical Building Codes for use in private spaces such as homes, hotel balconies and residential flats or as a pool enclosure. Load test of 0.8 kN certified by Applus.

This system brings together the differential values of the Comenza brand:

- Design. The design of the CC-780 system is characterized by being innovative, minimalist and elegant, in line with modern day architecture.

- Safety. Guaranteed safety of the client, complying with all technical requirements of a legal and regulatory nature. We test our systems in our laboratory according to international standards and accredited certifiers.

- Easy installation. In accordance with our commitment to guarantee simple, fast and economical assemblies, the new GlassFit CC-780 system incorporates Slot 180 and Level 3D leveling devices that allow perfect alignment with the installed glass.

[esp]

Le nouveau système de garde-corps en verre propose l'intégration du dispositif **Level 3D** dans la pince au sol, ce qui permet de corriger les dénivelllements de la dalle tout en conservant l'esthétique.

Il a été conçu selon les différents codes techniques du bâtiment pour une utilisation dans les espaces privés tels que les maisons individuelles, les balcons d'hôtels et les bâtiments résidentiels ou comme les abris de piscine.

Ce système réunit les valeurs qui diffèrent la marque Comenza :

- Design. Le design du système CC-780 se caractérise par son aspect innovant, minimaliste et élégant, en accord avec l'architecture contemporaine.

- Sécurité. Notre objectif est de garantir la sécurité de l'utilisateur final, tout en respectant les normes locales. Nos systèmes sont testés selon les normes internationales dans notre laboratoire et sont certifiés en externe par les organismes locaux compétent.

- Facilité d'installation. Conformément à notre engagement d'assurer un montage simplifié, rapide et économique, le nouveau système GlassFit CC-780 intègre les dispositifs de nivellement Slot 180 et Level 3D qui offrent un nivellement parfait avec le volume de verre installé.

2

3

El soporte está diseñado para posibilitar su fijación en un solo tiempo usando tacos premontados. Una vez finalizado el montaje y asegurado el soporte sobre la superficie de apoyo, se fija el embellecedor ejerciendo una pequeña presión sobre la base, quedando la goma oculta en su interior. [img.1]

Pasos de instalación con ST-353:

1. Taladrado de la pared
2. Colocación de pieza
3. Fijar el soporte a la pared con el tajo premontado [img.2]

Pasos de instalación en soportes convencionales:

1. Taladrado de la pared
2. Colocación del tirafondo
3. Colocación de la pieza
4. Fijar el soporte [img.3]

This product has been designed to enable its fixing at once using nylon hammer drive anchor. Once the assembly is finished and the support is fastened on the support surface, the cover is placed pressing slightly on the base, and the rubber rests hidden inside. [img.1]

Installation steps with ST-353:

1. Drill the wall.
2. Place the ST-353.
3. Fix the support to the wall with the preassembled anchor. [img.2]

Installation steps with traditional supports:

1. Drill the wall.
2. Place the lag bolt.
3. Fix the piece.
4. Fix the support. [img.3]

Ce support a été conçu pour faire possible la fixation d'un coup d'ancrages pré-assemblés du type de cheville en plastique. Quand le montage est fini et le support bien fixé à la surface d'appui, on fixe l'enjoliveur en exerçant une petite pression sur la base, en restant la caoutchouc torique cache dans l'intérieur. [img.1]

Installation avec le support ST-353:

1. On perce le mur.
2. On place la ST-353
3. On fixe le support au mur avec l'ancrage pré-assemblé. [img.2]

Installation avec un support traditionnel:

1. On perce le mur.
2. On place la vis tire-fond.
3. On place la pièce.
4. On fixe le support. [img.3]

**FAST FIX GLUE (A-B 100ML)**

1 kit

Duración aproximada / Estimated duration / Duration approximative

ø50,8	ø43	ø38,1	ø20	ø12
40	50	60	120	150

Características FAST FIX GLUE

- Envase bicomponente A+B
- Tiempo de manipulación: 1 - 3 minutos.
- Resistencia funcional: 30 - 60 minutos.
- Resistencia final: 24 horas.
- Holgura (mm): mín. 0,05 - máx.0,50 (recomendada 0,10 - 0,30).
- Guardar en el recipiente original bien cerrado y a temperaturas entre 5°C y 25°C.

FAST-FIX GLUE characteristics:

- A+B Bi-component packaging
- Handling time: 1-3 minutes
- Functional resistance: 30-60 minutes
- Final resistance: 24 hours
- Clearance (mm): min. 0.05 - max. 0.50 (recommended: 0.10-0.30)
- Store in the original pack, tightly sealed and at the temperature between 5°C and 25°C

Caractéristiques FAST-FIX GLUE

- Flacon bicomposant A+B.
- Temps de manipulation : 1-3 minutes
- Résistance fonctionnelle : 30-60 minutes
- Résistance finale : 24 heures
- Espace (mm) : min. 0,05 - max. 0,50 (recommandé : 0,10 - 0,30)
- Conserver dans le récipient original, bien fermé et à températures entre 5°C et 25°C.

[esp]

El acero inoxidable aun siendo uno de los materiales más resistentes del mercado necesita de cuidados y mantenimientos que prolonguen su vida útil y para ello es importante utilizar los productos adecuados.

Desde Comenza ponemos a tu disposición dos productos que utilizados de manera correcta permitirán que tus barandillas de acero inoxidable luzcan en perfecto estado.

- **Clean+:** para limpieza rutinaria, mantenimiento periódico y eliminación de huellas.
- **Stain Zero:** para limpieza de manchas difíciles y marcas de oxidación.

[eng]

Even though stainless steel is one of the most resistant materials in the market, it needs care and maintenance, so its service life can be extended. For this reason, it is important to use the right products.

At Comenza we offer two products that, when used correctly, will allow your stainless steel railings to look always perfect.

- **Clean+:** for everyday cleaning, regular maintenance and fingerprints removal.
- **Stain Zero:** for the removal of difficult stain and rust marks.

[fra]

Bien que l'acier inoxydable soit un des matériaux les plus résistants du marché, il a besoin des soins et de l'entretien pour que sa vie utile soit plus longue. Pour cette fin, c'est important d'utiliser les produits adéquats.

Chez Comenza, nous offrons deux produits qui, employés correctement, permettront que votre garde-corps brille comme le premier jour.

- **Clean+:** pour le nettoyage habituel, l'entretien régulier et l'élimination d'empreintes.
- **Stain Zero:** pour l'élimination de taches difficiles et de marques d'oxydation.
